

TRUESDALE LAKE

ATTENTION RIPARIAN PROPERTY OWNERS

The attached brochure from the Universal Water Solutions Company describes the function of the Aqua Cleaner. Universal Water Solutions used the Aqua Cleaner on two shore front properties on Truesdale Lake last year. The brochure provides a very clear and accurate description of how the process works for either removing weeds and other solids from your shorefront or for dredging your shore front.

Universal Water Solutions will offer any Riparian Property owner on Truesdale Lake a special rate if you contact them before June 1st. Also, you can get special rates if adjacent property owners agree to have them perform the service at the same time.

We will continue to treat the lake for weeds, but as most of you are aware the treatment does not always eliminate all the weed growth, especially along the shore lines.

If you are interested in this service please contact Universal Water Solutions directly.

In addition to the above, Allied Biological, Inc., the company that has been treating our lake for a number of years, has a special offer for riparian property owners. For \$995 they will plant approximately 100 feet of shoreline with a mixture of native, flowering, herbaceous plants. This includes both in water and at/above waterline plantings. These plantings will protect the lake. The price is good through June 15th. If you would like more information regarding this offer contact Gary Struve at 763-9302.
